

MUTHU SURESH

FRONTEND AND BACKEND DEVELOPER

PROJECT DONE

Mentorship and Team Collaboration Portal

Developed a full-stack Django web application enabling students to register, create detailed profiles, showcase project work, form teams based on domain expertise, and communicate via an integrated chat system. Implemented session-based authentication, JSON-based data handling, a dynamic dashboard for notifications and team management, and a project showcase module with edit/delete access control. Focused on clean UI, effective collaboration workflows, and user-specific experiences.

Mentorship & Team Collaboration System

Built a Django-based web platform to manage student profiles, project showcases, and team formation workflows. Designed session-based authentication, handled data using JSON files, and developed views for project CRUD operations, team matching logic, and real-time notifications.
